RODRIGO JARA

Senior Full Stack Developer & Systems Architect

Santiago, Chile · Remote · rjara001@gmail.com · +56 9 8765 4321 · linkedin.com/in/rodrigojara · github.com/rjara

RESUMEN PROFESIONAL

Seasoned Full Stack Software Engineer con más de 12 años de experiencia diseñando y entregando soluciones escalables de alto rendimiento para plataformas globales y fintechs (PayPal, Chambers & Partners, Dunnhumby, Falabella, Raisin). Especializado en arquitecturas distribuidas, microfrontends, optimización de latencia y desarrollo full-stack con TypeScript, React, Next.js, Angular 21, Node.js, .NET 10 y cloud en AWS y Azure.

HABILIDADES TÉCNICAS & STACK

- **Lenguajes & Core:** TypeScript, JavaScript, C#, .NET 10, Go, Python, SQL, HTML5, CSS3
- **Frameworks & Frontend:** Angular 21, Native Federation, React, Next.js, NestJS, Node.js, Tailwind CSS, MediatR
- **Cloud, Datos & DevOps:** AWS, Azure, Docker, Kubernetes, AKS, PostgreSQL, SQL Server, Databricks, CI/CD, GitLab, OpenTelemetry

EXPERIENCIA LABORAL

Senior Full Stack Developer

@ ParserDigital / Chambers & Partners · Oct 2025 — Present · Remote

- Delivered the Digital Submissions platform for Chambers & Partners in 7 months, on time and on budget, rolling out to 10,000+ law firms worldwide for legal rankings.
- Replaced fragmented manual submissions with live digital workflows, converting Word/Excel documents into structured collaboration and contributor tracking.
- Owned the end-to-end development of the History Navigation audit component, visual diffing additions, removals and modifications across document versions.
- Developed frontend microfrontends using Angular 21 and Native Federation, implementing modular reactive state flows with Signals and OnPush detection.
- Architected backend microservices with .NET 10 Minimal APIs and MediatR applying Vertical Slice Architecture to decouple domain logic.
- Integrated with Chambers Central API (CcApi) and configured CI/CD pipelines with Azure DevOps and Docker with automated xUnit test suites.

Tecnologías: Angular 21, Native Federation, .NET 10, Minimal APIs, MediatR, Azure DevOps, Docker, xUnit, CcApi

Full Stack Developer

@ ParserDigital / Dunnhumby · Oct 2024 — Oct 2025 · Remote

- Built and maintained dynamic enterprise reporting dashboards using Next.js and NestJS, integrating Databricks APIs for large-scale curated datasets.
- Designed and implemented PostgreSQL relational models and stored procedures, improving report query throughput by 35%.
- Integrated Azure Service Principals for secure token management and serverless query execution via NestJS.
- Deployed scalable applications on Azure Kubernetes Service (AKS) with automated CI/CD pipelines in GitLab and observability via OpenTelemetry.

Tecnologías: React, Next.js, NestJS, .NET 9, PostgreSQL, Azure, AKS, Databricks, GitLab, OpenTelemetry

Backend Developer

@ Raisin · Sep 2023 — Oct 2024 · Remote

- Developed core SaaS platform features, maintainable back-office REST APIs and batch transaction processors using .NET Core and Go.
- Optimized SQL Server stored procedures and database indexes, reducing batch execution windows by 40%.
- Led automated deployment of microservices to AWS, improving release stability and zero-downtime rolling updates.

Tecnologías: .NET Core, GraphQL, Go, Node.js, AWS, SQL Server, Docker

Full Stack Developer
@ AndBank.com · Aug 2022 — Sep 2023 · On-Site

- Enhanced digital banking mobile and web interfaces with React, TypeScript and C# .NET Core.
- Implemented multithreading background data loading in C#, reducing mobile cold-start loading times by 50%.
- Streamlined release pipelines and crash diagnostics via App Center and automated integration tests.

Tecnologías: React, TypeScript, .NET Core, Xamarin, C#, App Center

Full Stack Developer (Remote)
@ Taller Technologies / Paypal.com · Mar 2021 — Jun 2022 · Remote

- Developed features for PayPal investment mobile app using React Native, improving onboarding flow conversion by 22%.
- Implemented GraphQL APIs and serverless AWS Lambda functions, reducing backend latency to sub-80ms p99.
- Hardened checkout core repositories, eliminating critical concurrency bottlenecks during high-traffic promotional events.
- Participated in Agile Scrum sprints using Jira, collaborating with cross-functional global teams across US time zones.

Tecnologías: React Native, TypeScript, Node.js, GraphQL, AWS Lambda, Docker, Kubernetes

Full Stack Developer
@ Falabella Bank, Santiago · Jan 2020 — Mar 2021 · Santiago, Chile

- Developed omnichannel banking digital experiences, implementing secure customer onboarding flows and account management microservices.
- Implemented CI/CD pipelines and automated integration testing with Jenkins, Docker and Jest, accelerating sprint release cycles.
- Maintained and optimized REST APIs and Apigee gateways handling high-volume transaction loads.

Tecnologías: Node.js, NestJS, REST APIs, Docker, Jenkins, Apigee, Jest

Technical Lead
@ Falabella Retail, Santiago · Apr 2019 — Jan 2020 · Santiago, Chile

- Led and mentored an engineering team building enterprise AI-driven virtual assistants using Azure Cognitive Services.
- Delivered process automation solutions leveraging Azure RPA and GCP serverless, saving 300+ hours of monthly manual operational workload.
- Oversaw containerized deployments on Kubernetes with strict code reviews and testing standards.

Tecnologías: Node.js, Azure Cognitive Services, GCP, Kubernetes, PostgreSQL, Docker

Ingeniero & Arquitecto Creador
@ Proyectos Personales & Consultoría Independiente · 2023 — Present · Laboratorio Personal

- Desarrollo de herramientas de software libre, prototipos de IA, experimentos de arquitectura distribuida e investigación técnica.
- Implementación de arquitectura local-first con cifrado en cliente y sincronización asíncrona.

Tecnologías: TypeScript, Next.js, AI/LLMs, Tailwind CSS, Go

EDUCACIÓN & CERTIFICACIONES

Ingeniería en Computación e Informática
Universidad de Chile · Titulado con Distinción

Certificaciones:
• AWS Certified Solutions Architect - Associate
• Certified Kubernetes Administrator (CKA)

IDIOMAS

• Español: Nativo
• Inglés: C1 Profesional / Avanzado (Flujo técnico y conversación de negocios diaria)
